## About us

**Keystone Vinyl Technology, LLC** is proud to have been a producer of custom vinyl fencing and railing since 2008. We are dedicated to crafting products that perfectly fit your needs. The projects that you dream up are unique, and our broad selection of style offerings are too. They can be cut to your exact specifications using our high-tech computerized router machine. Lots of effort goes into creating beautiful projects. Rest assured that KVT products will give your creations a **brand new look** that stands the test of time. Made in the United States, they will not only last for years to come and require little maintenance, but they will clean up nicely and expertly align with the overall look you desire.

## Warranty

Our vinyl fencing systems come with a LIMITED LIFETIME WARRANTY.

# Frequently Asked Questions

## *What's in your vinyl?*

Our vinyl is made in the USA with base ingredients of natural gas, crude oil and salt used to produce poly vinyl chloride resin. Our vinyl compound is formulated from only premium-grade raw materials obtained from sources in the continental USA, which include PVC resin, impact modifiers, UV inhibitors, and stabilizers. Using only the best raw materials in conjunction with a time-tested formulation produces a vinyl profile that is far superior to the rest of the industry as a whole. Every single truckload is tested before being released to production, which guarantees a high quality product.

## *How is a vinyl profile made?*

Our vinyl fence starts out as a high quality PVC compound that is fed into an extruder. During the extrusion process, friction and very high pressure creates heat which melts the compound into a soft taffy-like consistency. This vinyl is then forced through a die in the shape of the finished profile. After going through the die the vinyl then passes through a series of vacuum sizers and water tanks to keep the hot vinyl in its proper shape until cool enough to touch.

## *Do your profiles 'chalk'?*

Because we use a special non-chalking TiO<sub>2</sub>, our fencing will have very minimal chalking even after years of exposure to the elements.

## *How much more than wood does a vinyl fence cost?*

In most areas of the country a new vinyl fence will cost slightly more than a wooden one. When all costs are factored in, a vinyl fence will actually save you money over the long run in maintenance costs (painting, staining, replacing split or broken boards). These costs coupled with having to replace the wooden fence in 10 to 15 years makes vinyl the clear money saver.

## *What effects does my vinyl fence have on our environment?*

KVT's vinyl products are safe and non-toxic. All of our materials are lead free. They will not break down or release toxic chemicals into the ground and will never require stains, acids, waterproofing, paint, or paint thinner for regular upkeep like pressure treated wood can. Our vinyl will not leach chromium, copper and arsenic into the ground as treated lumber does. No trees are used in the manufacturing process of our fencing, and the long life of our fence eliminates the need to rebuild.

## *Can my vinyl fence break?*

Anything will break if enough force is applied. However, KVT's vinyl profiles have excellent impact modifiers that provide an impact rating far beyond what is required by ASTM standards.

## *Vinyl vs. Wood*

Wood absorbs moisture, causing it to rot and splinter. It needs to be painted on a regular basis to keep it looking nice on a short term basis.

Vinyl is very low maintenance. It does not absorb moisture, and with an occasional cleaning, will look as good as new for many years to come.

All posts are routed with a 3" hole at the bottom of the post, ensuring adequate concrete flows inside the post to lock it into place.

# Picket Fence

*Olde Towne*

Available Heights	Picket Styles	Picket Size	Picket Spacing	Reinforcement	Rail Size	Mid Rail	Post Size	Section Length
3', 4', 5'	Straight, Concave, Deluxe Concave	1½" x 1½"	1½"	Aluminum in bottom rail	2" x 6" Top 2" x 3½" Bottom	N/A	5" x 5"	8'

*Revere*

**Picket Clip**—Pickets are fastened with "hidden picket clips" so no visible attachments are seen. This method allows for the flush mount look of a traditional picket fence.

Available Heights	Picket Styles	Picket Size	Picket Caps	Picket Spacing	Picket Spacing	Rail Size	Mid Rail	Post Size	Section Length
